

OVERVIEW

Pasha Brand's wholly owned subsidiary, **BC Craft Supply Co. Ltd.** will assist micro-cultivators through development, licensing, testing, and distribution of craft cannabis products, in exchange for a guaranteed supply agreement with each micro-cultivator. Under the Health Canada framework, each micro-cultivator will be able to legally process approximately 500 kilograms of dried flower per year. For every 150 micro-cultivators BC Craft secures, up to 75,000 kilograms of world-class craft cannabis could be available to the market via Canada's regulated supply chain.

LICENCED PRODUCERS ALONE CANNOT KEEP UP WITH CONSUMER DEMAND.

How Could Craft Growers Solve the Supply Concern?

By nature, craft growers are much smaller in size than LPs, and operate in a central hub facility.

Our team of industry experts offers craft cultivators one-on-one support for growing techniques, quality assurance, facility design, security clearances, health and safety standard compliance, staff training, product distribution and more.

150 MICRO-CULTIVATORS would produce 75,000kg of cannabis annually - **putting it on the same competitive field as 55 LPs.**

Average production: **500 kg / year**

What makes craft growers unique?

Focus on high quality over mass produced volume.

Premium products also bring in higher margins.

Security

- ✓ Perimeter barriers
- ✓ Security cameras
- ✓ Key card locks
- ✓ Intrusion alarm
- ✓ Secure storage space
- ✓ Intrusion alarm
- ✓ Backup power

Reporting

- ✓ Good Production Practices (GPP)
- ✓ Standard of Procedure (SOP)
- ✓ Reporting and Tracking Systems
- ✓ Fulfill infrastructure and equipment requirements

Quality Assurance

- ✓ Quality Assurance Infrastructure
- ✓ Analytical Testing
- ✓ Safety Requirements
- ✓ Packaging Compliance

Distribution

- ✓ Established Distribution Network
- ✓ Partnership with Southern Glazer, North America's largest alcohol distributor
